

Delivery Preference Change Guide

Blue Cedar Service Cooperative
Document ID: CS-DPG-1800 | Revision: 2026-07-23

Audience	Service staff and authenticated service users
Authority	Blue Cedar Service Cooperative service owner
Record	CS-DPG-1800 controlled publication

About this service

This customer-support procedure is designed for traceable case handling. Agents must use the existing customer case, preserve identity checks, and record each material change so a later reviewer can reconstruct the decision.

Published service facts

The service guide publishes the following facts. A customer may change delivery preference until 18:00 on the working day before dispatch. A full delivery-address change requires identity confirmation. A safe-place note does not change the registered account address. Changes made after the cutoff apply only if fulfilment confirms them.

Request journey

1. Open the active delivery in ServiceLane. 2. Choose safe place, collection point, or address change. 3. Complete identity confirmation for a full address change. 4. Save the confirmation in the delivery case.

Delivery Preference Change Guide - operational appendix

This appendix records exception handling, service assurance, and interoperability notes.

Important exceptions

Restricted goods cannot use unattended delivery. Carrier lock may prevent a late change.
Account-address updates use the separate profile process.

Record quality and review

The service owner for Delivery Preference Change Guide reviews exceptions against the original case record. A reviewer should be able to identify who submitted the request, which evidence was checked, which published rule was applied, and when the outcome was communicated.
