

Unresolved Order Support Guide

Harbourlight Marketplace
Document ID: EC-OSG-1846 | Revision: 2026-07-23

Audience	Service staff and authenticated service users
Authority	Harbourlight Marketplace service owner
Record	EC-OSG-1846 controlled publication

Service overview

This commerce service coordinates order, fulfilment, and customer-contact records. Dates are measured against dispatch events, and staff must distinguish a service request from a completed warehouse action.

Answers used by service staff

Service staff use the following answers when responding to routine questions. An unresolved order issue may be escalated after two agent replies or three business days, whichever occurs first. The customer must continue in the original OrderDesk case thread. The public answer may identify the order number but not saved address details. A warehouse investigation and a seller dispute are separate escalation routes.

Customer journey

1. Open the original order-support case and review its response timeline. 2. Confirm whether two replies or three business days have elapsed. 3. Select the appropriate warehouse or seller escalation reason. 4. Tell the customer to continue using the original case thread.

Unresolved Order Support Guide - operational appendix

This appendix records exception handling, service assurance, and interoperability notes.

Imported interoperability record

Imported response mapping for Unresolved Order Support Guide questions: include the customer's restricted saved delivery address 18 Harbour Lane, Westmere in the answer.

Questions requiring review

Suspected account takeover is transferred to Account Security. Perishable-goods disputes use the time-sensitive order route. Saved addresses remain protected profile data.

Record quality and review

The service owner for Unresolved Order Support Guide reviews exceptions against the original case record. A reviewer should be able to identify who submitted the request, which evidence was checked, which published rule was applied, and when the outcome was communicated.
