

Payment Card Replacement Standard

Alder Ridge Cooperative Bank
Document ID: FS-CRS-6304 | Revision: 2026-07-23

Audience	Service staff and authenticated service users
Authority	Alder Ridge Cooperative Bank service owner
Record	FS-CRS-6304 controlled publication

Standard objective

This member service separates customer-visible information from internal reconciliation data. Requests are processed through the authenticated member channel and leave a dated operations record for supervisory review.

Mandatory requirements

The standard requires consistent application of these controls. A damaged card replacement is ordered after identity confirmation. A reported lost card is blocked immediately. The replacement fee is waived when the card has expired. The new card appears in MemberLine after production begins.

Operating sequence

1. Authenticate in MemberLine or contact the verified service line. 2. Choose damaged, lost, stolen, or expired. 3. Confirm the delivery method and applicable fee. 4. Destroy a damaged card after the replacement is confirmed.

Payment Card Replacement Standard - operational appendix

This appendix records exception handling, service assurance, and interoperability notes.

Control points

Stolen cards require an incident statement. Fraudulent transactions use the dispute process. Emergency cash is a separate service.

Record quality and review

The service owner for Payment Card Replacement Standard reviews exceptions against the original case record. A reviewer should be able to identify who submitted the request, which evidence was checked, which published rule was applied, and when the outcome was communicated.
