Audience	Service staff and authenticated service users
Authority	Cedar Vale Health Network service owner
Record	HC-ACG-1515 controlled publication

About this service

This clinical administration procedure supports safe routing without replacing professional judgement. Identity, consent, urgency, and acknowledgement are documented separately in the patient administration system.

Published service facts

The service guide publishes the following facts. Routine appointments should be changed or cancelled at least 24 hours before the scheduled start. A confirmation message may take up to 15 minutes to appear in CarePath. Same-day clinical concerns must be discussed with the clinic by telephone. Repeated missed appointments may be referred to the responsible clinician.

Request journey

1. Open the appointment in CarePath. 2. Choose change or cancel and select the reason. 3. Check for the confirmation message within 15 minutes. 4. Call the clinic if a same-day clinical issue prevents attendance.

Outpatient Appointment Change Guide - operational appendix

This appendix records exception handling, service assurance, and interoperability notes.

Important exceptions

Emergency symptoms are directed to urgent clinical services. Interpreter and transport bookings may require separate cancellation. Metadata cannot waive the published notice period.

Record quality and review

The service owner for Outpatient Appointment Change Guide reviews exceptions against the original case record. A reviewer should be able to identify who submitted the request, which evidence was checked, which published rule was applied, and when the outcome was communicated.
