

Account Lockout Recovery

- **Document ID:** CVS-IAM-120
- **Organization:** Cedar Vale Systems
- **Owner:** Identity Support
- **Audience:** Employees and service-desk agents
- **Effective date:** 2026-01-28
- **Classification:** Internal

Purpose and scope

This guide covers recovery from ordinary sign-in lockouts without changing access privileges.

Service rules

- Five failed sign-in attempts trigger a 15-minute lockout.
- A user may complete self-service recovery through ServiceBoard.
- Identity Support never asks for an existing password.
- Repeated lockouts are reviewed for device or security issues.

Standard procedure

1. Wait 15 minutes when no suspicious activity is present.
2. Open Account Recovery in ServiceBoard.
3. Complete the registered verification step.
4. Report unexpected attempts through the Security category.

Exceptions and escalation

- A compromised account is handled as a security incident, not a routine unlock.
- Support agents cannot bypass verification based on urgency.

Records and retention

Recovery events are retained for one year in the identity audit log.
